JSPS Postdoctoral Fellowship for Research in Japan
Summer Program

The JSPS Summer Program is implemented as a component of the JSPS Postdoctoral Fellowship for Research in Japan. It provides opportunities for young pre- and post-doctoral researchers from North America and Europe to receive an orientation on Japanese culture and research systems and to pursue research under the guidance of host researchers at Japanese universities and research institutes over a period of two months during the summer.

JSPS seeks cooperation from its overseas partners in recruiting candidates for the program. In implementing this program, our overseas partners are the National Science Foundation (USA), British Council (UK), Centre National de la Recherche Scientifique (France), Deutscher Akademischer Austauschdienst (Germany), the Canadian Embassy in Japan (Canada), and the Swedish Foundation for International Cooperation in Research and Higher Education (Sweden).

Summer Program

Youthful brilliance scintillates
in summer Japan

2017

JSPS Summer Program provides opportunities for young pre- and post-doctoral researchers from North America and Europe to receive an orientation on Japanese culture and research systems and to pursue research under the guidance of host researchers at Japanese universities and research institutes over a period of two months during the summer.

 JSPS

The Japan Society for the Promotion of Science (JSPS) operates as an independent administrative institution to perform the following main functions: creating diverse world-level knowledge, building robust international cooperative networks, fostering the next generation while enhancing the education and research functions of universities, and building evidence-based science promotion systems and strengthening linkage with society.
